

**Tender No.15/2014- Construction of Channel Dangert 1**  
**in SEZAD Duqm**

**Brief description of Works:**

The proposed Dangert 1 Channel is 11 km in length and is aligned along the existing wadi before discharging into the sea.

The channel will be constructed to a trapezoid section, with a variable bed width of 60 to 100 m and 2 to 4 m in height.

The embankment will be formed by compacting suitable excavation materials and protected by riprap.

There will be two box culverts provided for the crossing of the existing roads.

These culverts shall be designed by the Contractor.

The Contractor will also carry out site investigations, utility detection, protection and relocation as directed.
