Health, Safety & Environment Policy

Special Economic Zone Authority at Duqm (SEZAD) is committed to comply with the HSE standards in SEZD (Zone) in order to provide employees and residents at the Zone with a safe and healthy residential and work environment that is free from all environmental impacts.

We can achieve these goals by:

- Establishing legislation, regulations and procedures governing occupational health, safety and environment in the Zone, and providing appropriate control over projects operating within the Zone to ensure compliance with these legislations.
- Reducing environmental impacts of economic activities in the Zone through monitoring environmental permits, conservation of natural resources, disposal and recycling of waste and efficient use of energy.
- Rising awareness about health, safety and environment requirements among all segments of society in the Zone, instilling the principles of conserving the environment and its natural resources and supporting the efforts made towards achieving sustainable development.
- Finding appropriate channels by which employees and residents in the Zone report complaints related to health, safety and environment, and respond to them immediately and seriously.
- Investigating, reviewing and evaluating accidents affecting health, safety and environment in the Zone to identify deficiencies that could be avoided in the future and develop appropriate solutions.
- Developing emergency plans to ensure immediate response in case of accidents and crises in the Zone in coordination with the concerned authorities.
